

The diagram illustrates a many-to-many relationship between two tables: **users** and **posts**. A red curved arrow connects the **email** column in the **users** table to the **user_id** column in the **posts** table, indicating that multiple users can be associated with multiple posts.

users		
id		int
name		varchar
email		varchar
birth		datetime
active		boolean

posts		
id		int
user_id		int
title		text
body		text
created_at		datetime
active		boolean
